

# iOS development using Swift

## Class 4

Collections, Sorting, Mixing Objective-C, Building an  
app

# Plan for Class 4

1. Search for artist info on iTunes. Download it as JSON
2. Convert JSON to Dictionary
3. Extract album info from above Dictionary
4. Extract artist name from album info
5. Display artist name on iPad.
6. Get the background color from an Obj-C class
7. Sort ascending and descending

# Assignment

Assignment: Add thumbnail images to each artist in table
